What is E=MC^3?

This is not the lastest relativity theory, but it does relate to you! If you consider yourself ethnic (we all are) it is a formula you should remember. Translated Ethnic = MultiCultural Concerns Committee. We, the Ethnic Concerns Committee have renamed ourselves because of the misunderstandings and negative connotations about the name. We have also rewritten our constitution to clarify and refine our purpose. Traditionally, we have represented African Americans, Asian Americans, Hispanic Americans and Native Americans and have been seen only as an adversarial group. But we are unsatisfied with this definition and limitation. We are also burdened for all people attempting to integrate their cultural distinctives with their education at Fuller and to foster sensitivity to cultural diversity among our community.

There are many informal groups here on campus that fellowship, pray and address issues that concern specific people groups. With our revised constitution we are connecting the informal with the formal, not to oppress or lead, but to empower and to advocate for. This will give these informal groups at least one vehicle to address their cultural concerns. Other people at Fuller have a burden for the growing multicultural world and want to learn more effective ways to minister in the midst of diversity. This too, we would like to encourage and support. Also, we would like to foster awareness of how our American culture influences us. We do not know our own culture until we are confronted by another.

Fuller has yet to equip itself to prepare its students to work within an increasingly multi-cultural context. That is our concern and our aim in serving students.

Chair, MCCC
