ASC Takes a Look At Fuller’s Child Care

At last week’s Trustee meetings, the All Seminary Council and the Office of Student Services together addressed the Board of Trustees on behalf of Madison House, the day-care facility subsidized by Fuller Seminary for the children of its students, staff, and faculty.

Roberto Colon, President of the All Seminary Council, and Ruth Fuglie, Director of Student Services, along with several Graduate Union and Concerns Committee officers, met with the Student Affairs Committee of the Board of Trustees on Monday, November 4, to relay to them the critical role Madison House plays in the life of many child-rearing students at Fuller.

Madison House, located on Madison Ave. just South of the 210 Freeway, currently provides much-needed day care for infants and preschoolers of 52 families who are involved on the Fuller campus. Unfortunately, the 50 year-old building in which it is housed may require renovation at a cost of between $150,000 and $200,000. An entirely new facility could be costly close to twice the latter amount.

Students outlined the value of the facility to the Fuller community, the importance it places on family life, and how essential it is for students whose spouses also work or study full-time. Some students have told the ASC that they would not be able to attend Fuller if it were not for Madison House.

As the climax to the three-hour meeting, Cherry Chua, Director of Madison House, led the Committee from the Geneva Room on a walking tour of the facility itself while the day care was in session. During the tour, she pointed out both the need for improvements in the facility and the quality of Christian care and instruction given to the children.

The trustees were deeply impressed with the urgency of the students’ appeal. Apparently, the biggest obstacle to renovation is money. Lee Merritt, Chief Financial Officer of FTS and present at the Committee, explained that, since no capital was available at the time and loans would only put the burden back on students’ tuition, the only viable option would be looking for money outside the operating budget. Jim Bere, Fuller Trustee and CEO of Borg-Warner Corporation, expressed his appreciation for the unity of voice among the students represented.

The Committee brought the concern to the full Board of Trustees on the following day. They recommended to the Board that the Development Committee search for ways of raising equity for improvements on the facility. The recommendation was approved.

Thanks to the open ear and sensitivity of the Board of Trustees, the facility needs of the Madison House should be addressed before the end of the school year. If students have concerns about this issue, they are encouraged to bring them to the attention of their ASC representatives.

Looking for a word-processor with Greek & Hebrew support?

Hundreds of students use ChiWriter for their term papers and theses. ChiWriter is a 'what-you-see is what-you-get' multilingual word-processor compatible with almost every graphics card and printer model. Use the F3-KEY and a "pop-up" Greek vocabulary list appears — already positioned to the appropriate page. Use your arrow keys to point to a word, press the ENTER-KEY, and the list of references appears. CHIWRITER IS SO SIMPLE TO USE THAT NO MANUAL IS NECESSARY. (All of the help you will need is just an F1-KEY away.)

GRAMSEARCH, the "instant" Greek word concordance. Type in a Greek word and view all of its Greek New Testament occurrences. What about the myriad forms of a Greek word? GRAMSEARCH is fully lemmatized so that every occurrence of the word is retrieved (regardless of gender, number, case, tense, mood, etc.). Not sure of the spelling? Press the F2-KEY and a "pop-up" Greek vocabulary list appears — already positioned to the appropriate page. Use your arrow keys to point to a word, press the ENTER-KEY, and the list of references appears. GRAMSEARCH IS SO SIMPLE TO USE THAT NO MANUAL IS NECESSARY. (All of the help you will need is just an F1-KEY away.) All software modules are mutually compatible. Want to merge a concordance of λογίζομαι into your dissertation and add your own exegetical footnote? Just save your GRAMSEARCH results to disk, process them through GRAMGREEK, and you will have a word-processor-compatible file ready for full-font Greek display, editing, and printing under Horstmann Software's ChiWriter, WordPerfect 5.1 with Zondervan's Scripture Fonts, or Dragonfly Software's Nota Bene.

GRAMCORD, the concordance system which does more than just compare contexts on the basis of vocabulary. GRAMCORD will concord almost any type of grammatical construction that is lexically, morphologically and/or positionally defined. [Examples: optative verbs in the Pauline Epistles; év τῶν + present active infinitive; μή with the aorist imperative; two participles of the same lemma differing in voice and joined by καί; compound verbs based upon βιάζει; a comparison of διά with a genitive object vs. διά with an accusative object; μιᾷ ... δὲ as alternating particles; περί + feminine article/feminine noun + masculine article/masculine noun where each article/noun pair agrees in number and all five elements appear with non-intervening words; statistical breakdowns of verbal moods by book; analysis of yer according to its ordinal position in a clause.]. The concordance output is complete with textual references, full contexts, and relevant statistics ready for display on-screen, storage in a disk file, or printing. GRAMCORD Jr. allows one construction of almost any complexity to be concorded on a pass through the New Testament; GRAMCORD SCHOLAR'S VERSION concords up to twelve constructions simultaneously. With the new GRAMBUILD program, GRAMCORD concordances (grammatical & lexical) can be requested within a very simple, menu-driven, help-prompted interface. Anyone can learn how to request all the occurrences of a user-described grammatical construction without ever opening the GRAMCORD manual. After five minutes with GRAMBUILD anyone can create grammatical concordances of the Greek New Testament with very little effort. (If you haven't seen GRAMBUILD, GRAMBLD2, & GRAMPLOT, you haven't seen the latest GRAMCORD.)

"Anyone who undertakes the exegesis of the New Testament without familiarity with GRAMCORD does so at their own peril."

— Dr. Gleason L. Archer, Professor Emeritus, Trinity Evangelical Divinity School

GRAMGREEK/NA26, the easy way to convert a textual reference such as RV22:21 into Η χάρις τοῦ κυρίου Ιησοῦ μετὰ πάντων inside your wordprocessor document. On a grander scale, GRAMGREEK can transform 1JOHN 1-3 into a rendering of the Nestle-Aland 26th Edition Greek text to help the students of John's gospel; annotate the text or even write your own commentaries. GRAMGREEK is the logical bridge between the research capabilities of GRAMCORD and your choice of three multilingual wordprocessors: ChiWriter, WordPerfect with Scripture Fonts, or Nota Bene. ChiWriter is compatible with almost any printer or graphics card including the older 9-pins, CGA, laptop LCDs, and Hercules as well as the "high end" systems required by the other two wordprocessors; please confirm equipment compatibility before ordering.

PARSER PLUS continues to be a favorite of students and pastors. Type in a reference such as MT11:17 and instantly view a word-by-word grammatical breakdown of the Greek text for the verse. (For instance, λέγουσα is a 3rd person plural,
present, active indicative from λέγω.) You may also route the results to a file for editing and printing under your wordprocessor or integrate them with your own notes and personalized database system. Print out entire chapters of "parsed" Greek text for concentrated study or build your own interlinear analytical lexicon.

CHIWRITER GREEK-HEBREW EDITION is a full-featured, multi-lingual word-processing with a very definite "theological orientation." Greek, Hebrew, western European languages, many English fonts, Arabic, and a growing number of Biblical cognate languages are viewable on-screen and on almost every kind of printer imaginable. (Yes, this is a "what-you-see-is-what-you-get" word-processor and you will be pleased to see that the Hebrew vowels properly appear above and below the Hebrew consonants.) CHIWriter includes a powerful, theologically-oriented spellchecker with room for many more words of your own choice. Of course, CHIWriter is compatible with GRAMSEARCH, GRAMGREEK, and GRAMCORD. This versatile, multi-lingual word-processor allows you to display, print, and edit GRAMCORD concordances in full Greek with diacritical marks. Add your own commentary to concordance excerpts or prepare classroom handouts which illustrate features of the text. Write a dissertation. Do you like to build Greek/Hebrew sentence diagrams? Explore the new sentence diagramming capabilities of CHIWriter. As a part of our discounted software bundles, CHIWriter is an exceptional value. In fact, over 1000 professors, students, and pastors have taken advantage of our GRAMCORD/CHIWriter software bundle site affiliate discounts. (Add $45 for CHIWriter LaserJet/DeskJet support disk.)

SEPTUAGINT & MASORETIC OLD TESTAMENT TEXTS are now available by courtesy of the Center for the Computer Analysis of Texts at The University of Pennsylvania. With each "CCAT text" shipment, The GRAMCORD Institute encloses various freeware and shareware utilities including the means of converting the files for use within CHIWriter or Nota Bene. (A similar utility is already packaged with Zondervan's Scripture Fonts for use with WordPerfect.) These "CCAT text files" conform to the format requirements of a growing number of research-oriented programs.

MEMCARDS (from Memorization Technology). MEMCARDS is the electronic equivalent to flashcards. Build and maintain your Greek and Hebrew vocabulary with a combination of long-term/short-term memory drills. Each set contains 1000+ words but you can add your own words, paradigms, grammar rules, and more. Easy-to-use, flexible, intelligent — and inexpensive at the site discount of $29 each for the Greek and Hebrew versions (regular price: $35).

ANNOUNCING: The HAMMOREH Hebrew Grammar Tutorial System is a new approach to Hebrew language instruction. This color graphics tutorial [VGA required] offers unique visual reinforcement in the mastery of the basic grammatical forms of the Hebrew Old Testament. By means of color and movement HAMMOREH unravels the conjugation/patterns. The fascinating symmetry of ancient Hebrew is exposed through a self-paced, microcomputer-based presentation that utilizes eye-catching techniques not available in the static confines of the conventional printed textbook.

"I am glad indeed to commend the research of The GRAMCORD Institute as one of the most worthy frontier projects of our day."

— Dr. Carl F. H. Henry, former Editor, Christianity Today

"Thank you for your efforts on behalf of theological students everywhere. The programs are great — so much power that I wonder if I will ever utilize it all!"

— seminary student

"I wanted to share with you the excitement my students continue to have with GRAMCORD. This year I am using GRAMCORD with my first year Greek students. It has been great to supplement the textbook with examples of the constructions directly from the New Testament. The advanced students feel as if they are pioneering, blazing new ground. It is exciting to see their enthusiasm for study of the N.T. in Greek."

— Dr. Michael Moss, Assoc. Prof. of Bible, David Lipscomb University
