**The Lights Are On... AND THEY WORK!!**

We've finally got a stop light at the corner of Oakland and Walnut! That's great, but there are some of us who are used to sprinting across the street at the first sign of any car going less than 50 miles per hour, and we need to be careful. A number of Fuller folks have already found themselves in the middle of Walnut, under a green light and dodging traffic. **PLEASE BE CAREFUL** and don't cross against the light. It only takes 36 seconds for the light to change after you push the button to trigger the signal. That's all, a measly 36 seconds. (Yes, we actually stood out there and timed it. Some people will do anything to keep from studying at the end of the quarter...) By the way, the light stays green for exactly 16 seconds before turning yellow. (Yes, we timed that, too).

Here is the top 10 list of what you can do with that 36 seconds, instead of running out into the street and getting hammered:

1. Find out the name of the person standing next to you waiting for the light.
2. Memorize your Fuller I.D. number.
3. Memorize your projected graduation date.
4. Count to 36.
5. Watch students stagger out of the business office after paying their bills.
6. Watch students crawl into the business office to pay their bills.
7. Make faces into the School of Psychology office windows.
8. See how many different smells you can decipher wafting over from Amy's.
9. Recite the Apostle's Creed (or your favorite liturgy, depending on your denominational persuasion).
10. Find out the name of the person standing next to you waiting for the light.
